

**PETROGEAR** FZE  
OILFIELD EQUIPMENT MANUFACTURING

## PG-PBS-27ton Pipe Bin

### Product Overview

Petrogear pipe bins are used to make your well-site safer, more practical and more efficient. They can be used to store drill pipe at the rig site or as a container for transporting drill pipe by truck or barge.

Pipe bins can reduce your rig time and trucking cost and can decrease on site accidents that may occur to personnel in contact with moving tubulars. Petrogear can manufacture custom made bins and transport baskets to suit your operation, making your hydraulic fracturing job, drilling or workover project run more efficiently and save time on rig moves.

### Standard Features

- Stores 31Ft. / 9.5m 2-7/8" Joints - 24 joints per row, stacks 6 rows totaling 144 joints to a bin (21.6 Ton)
- Designed to accommodate any oilfield tubular and fit on a standard truck trailer.
- 2,500mm wide side access gate on both sides.
- 1,885mm wide front access gate.
- 12,100mm interior bin length can be partitioned into shorter length compartments.
- Protectors, cross-x-overs, subs, handling equipment or fishing equipment can be stored in the spare end compartments of the pipe bin.
- Additional end wall timber support for storage of partitions
- Forklift pockets through the entire base
- Third party load testing and inspection reports
- Unit is sprayed with zinc-rich epoxy primer, epoxy mid/top coat & polyurethane clear coat
